Description The way American modernist psychology approaches research on Asian Americans raises problematic issues regarding national race relations and oppression. Under modernist psychology, race is typically treated as a nominal, present-versus-absent category, such as on a census checklist or demographics questionnaire, and the complexity of racial experience and racism is all but ignored.

Critical race theory (CRT) is a theoretical framework in the social sciences that examines society and culture as they relate to categorizations of race, law, and power. It is loosely unified by two common themes. Firstly, that white supremacy exists and exhibits power maintained over time, and, in particular, that the law plays a role in this process. Secondly, that transforming the ...
