A subclass of an abstract class is itself abstract until all pure virtual methods have been overridden by non-abstract (that is, concrete) versions. Thus the class MicrowaveOven in the previous code snippet is not abstract — even if Oven were abstract — because it overrides cook() with its own concrete version.

The code of the street emphasizes maintaining the respect of others through a violent identity, toughness, and exacting retribution when someone disrespects ("disses") you. Thus, the code regulates the use of violence and provides a rationale that allows those inclined toward aggression to initiate violent encounters in ways approved by the code of the street.
