The clove hitch is the best knot to use when you are assembling a temporary shelter. A clove hitch is used to lash one pole or support to another.

Where To Download

Typically, you will want to tie the clove hitch in the middle of the rope. This is because there will usually be tension applied to both ends of the rope.

square knot is a variation using the half-knot method. Which is basically half knots tied in an alternating order. So easy! If you begin tying the knot with the right cord in front (left photo), tie the next knot with the left cord in front (right photo). Reverse the order and repeat the knots again.

This knot is popular among mountaineers, climbers, sailors and others. Use the bowline when you need a non-slip loop at the end of a line. The knot won't slip, regardless of the load applied. Begin by forming a loop or "rabbit hole." The "rabbit" (working end) of the rope goes up through the hole, around the tree, then back down the hole.
