Apollo 14 Lunar Surface Checklist - NASA
In the Apollo program, the MCC launch status check was initiated by the Flight Director, or FLIGHT.The following "preflight check" order was used before the launch of Apollo 13: BOOSTER - Booster Systems Engineer (monitored the Saturn V in pre-launch and ascent); RETRO - Retrofire Officer (responsible for abort procedures and Trans-Earth Injection, or TEI, retrofire burns)

Launch status check - Wikipedia
I have a training copy (ex astronaut) of an orbit ops checklist from STS-50 and a SAIL-used copy of the ascent checklist from STS-132. Beginning with STS-114, NASA posted the digital files for the FDF checklists online, so it is possible to print one exactly as was used at Johnson Space Center. Chuckster01 Member . Blue Origin, along with it partners Lockheed Martin, Northrop Grumman and Draper, was one of three companies to be awarded contracts by NASA to develop human lunar landers for future moon missions.

Blue Origin's human lunar lander all-star space team ...
The space agency said it will have radiation detectors and a safe shelter aboard all Orion crew capsules flying to the moon. As for the actual landers, three separate corporate teams are developing their own craft with NASA oversight. For the first Artemis moon landing, at least, the astronauts will live in the ascent portion of their lander.
