Attachment Evolution And The Psychology Of Religion

There are many notable examples of psychological theories with evolutionary bases, such as Bowlby's (1969) model of attachment, yet these are often isolated examples. In the last three decades, the evolutionary perspective has been reinvigorated with considerable theoretical advances and a continually growing array of empirical studies.

Evolutionary Theory and Psychology

The Evolutionary Theory of Attachment - John Bowlby, 1969 (Description, AO1): Bowlby's theory (1969) is an evolutionary theory. He proposed infants form an attachment to a caregiver because attachment is adaptive (aids survival). Attachment is seen as a biological process because he argues infants are born with an 'attachment gene' that programmes them to exhibit innate behaviours called ' social releasers' which increase their chances of receiving care such as clinging, crying ...
