Autism statistics from the U.S. Centers for Disease Control and
Prevention (CDC) identify around 1 in 68 American children as on
the autism spectrum—a ten-fold increase in prevalence in 40
years. Careful research shows that this increase is only partly
explained by improved diagnosis and awareness.

Autism in Adulthood | Vol 1, No 4

About 1 out of every 150 children in the United States is diagnosed with an autism spectrum disorder. Even if vaccines caused autism in only 1 percent of those children - meaning 1 out of every 15,000 children - the problem would have easily been detected by epidemiological studies.

Volume 1 Summer 2008 Some parents of children with autism ...

Absolutely love this book for my 3yr old with autism. The reason being this book is not to other kids/ppl about autism it's about the child with autism themselves. It gives off a really fun positive imagine into Autism. I bought a few books and return them because they all would make something about autism seem negative or wrong which it's not.

Autism spectrum disorder (ASD) is an early-onset neurodevelopmental condition with an estimated prevalence of ~1 in 68 [1]. ASD is expressed across a spectrum of severity in two core phenotypic domains: persistent deficits in social interaction and communication and restricted, repetitive behaviors and interests.
