Manual vs. Automatic Transmission | Digital Trends

A car needs a full working transmission (or gearbox) in order to allow the vehicle to change gears, but the inner workings of a vehicle differs greatly between a manual transmission car and an automatic transmission car. A manual car is recognisable from the inside, as it contains a clutch pedal, which is used to change gears, as well as a gear shift stick between the two front seats, which offers full control of the car and between 5-6 gears and reverse.

Manual vs. Automatic Car Transmission: Which is Best?

The most obvious difference between automatic and manual vehicles is the layout of the shifter — that is, the lever that changes the transmission's gear placement, usually located between the two front seats of the car in newer models and sometimes attached to the dash or steering column in older models.
