My 1992 525i E34 M50 has an idle problem, but only after the engine warms up. When the engine is cold the idle is steady right around 600 - 700 RPMs. But, after the engine warms up to normal operating temperature, the idle bounces around between 1000 and 2000 RPMs. I have no computer fault codes nor do I have a check engine light. The first thing I did is replace the coolant temperature sensor.
