2 Chapter 1: Fundamental Concepts of Time-Series Econometrics we may assume that the variance of each  $y_t$  is the same and that the covariance between each adjacent pair of elements  $\text{cov}(y_t, y_{t-1})$  is the same. If the distribution of  $y_t$  is the same for all values of  $t$ , then we say that the series is  $y_t$  stationary, which we define more precisely below.
