If you are looking for Indie books, Bibliotastic provides you just that for free. This platform is for Indie authors and they publish modern books. Though they are not so known publicly, the books range from romance, historical or mystery to science fiction that can be of your interest. The books are available to read online for free, however, you need to create an account with Bibliotastic in order to download a book. The site they say will be closed by the end of June 2016, so grab your favorite books as soon as possible.

### **Chapter 24 Immune System And**

The immune system must distinguish between "self" (normal components of the body) and "nonself" (foreign tissues or substances). In some cases, this mechanism is faulty and the body destroys its own cells. (281) Click again to see term  1/43

24.1: What is the Immune System? Overview. The immune system comprises diverse biological structures and processes that protect the body from disease. These processes can be classified into innate and adaptive immunity. To work effectively, the immune system needs to detect pathogens by distinguishing the body's own structures from foreign elements.

## **Immune System (Human Anatomy) - Components & Purpose**

Innate immune system: acts quickly but is nonspecific (ex. Someone enters a classroom, we don't know who they are but we know they don't belong) Adaptive immune system: takes longer (esp. first time) but is specific (identifies it to attack it the best way possible) Once the system sees a foreign pathogen, it will recognize it in the future and can attack it quicker
