Similarly, energy is a property that humans and others – both living and nonliving matter – possess to a greater or lesser extent; we are pretty much unaware of its existence, however, until it is converted into work, heat or radiation. The above definition of energy highlights the fact that energy conversion is essential for energy utilization.

Chapter 2 CONCEPT OF ENERGY

The energy of motion; the energy of the mass of the matter that is moving. Moving matter performs work by transferring its motion to other matter. Also known as "thermal energy," it is the amount of energy associated with the movement of atoms and molecules in a body of matter. It is energy in its most random form.
