The FHWA is revising § 625.4(a)(2) to replace the reference to the January 2005 edition of A Policy on Design Standards—Interstate System with the May 2016 edition. This Policy is a comprehensive manual to assist State DOTs and local agencies in administrative, planning, and educational efforts pertaining to design formulation for projects on the Dwight D. Eisenhower National System of Interstate and Defense Highways (Interstate).

### Federal Register :: Design Standards for Highways

This guide provides design information for a variety of multimodal facility types applicable to small town and rural settings. Each facility type is categorized by its degree of separation from the motor vehicle travel lanes. Facilities should be selected in response to the prevailing speed and volume of motor vehicle traffic.

The purpose of the City of Bend Roundabout Design Consistency Guidelines is to promote consistent roundabout design within the City by: • reinforcing the design guidelines contained in the FHWA's Roundabouts: An Informational Guide (FHWA Guide, Reference 1) and subsequent national research, and

### Roundabout Evaluation and Design Guidelines

The FHWA recently released a design guide for protected bike lanes. Streetsblog has an excellent write up on it. In a local nod, the cover photo of the guide is of the L Street protected bike lane (by WABA's own Alex Baca) and there are a few other photos of the M and L lanes as well. It also calls out DDOT for money saving techniques and introducing bike-sharing in 2008.

### FHWA Separated Bike Lane Planning and Design Guide

Where a return is constructed, the foundation excavation should extend at least three times the base rock width (3B) into the site. (1) The non-woven geotextile placed behind the rockery (as discussed later in the chapter) should extend down the entire back cut and across the entire width of the foundation excavation.

### FHWA - Center for Local Aid Support - Publications

Roadway Safety. This research emphasizes two fundamental objectives: keeping vehicles on the roadway and minimizing the consequences of a vehicle leaving the roadway. Federal Highway Administration's (FHWA's) Roadway Safety research develops and promotes strategic initiatives that decrease roadway departures, reduce the number and severity of crashes resulting from roadway departures, and enhance knowledge and the tools and methods that will support sustainable efforts to monitor roadway ...

### Roadway Safety | FHWA

For arterials with 2000 or more ADT in reservoir areas, two 3.6 m lanes with 3.0 m shoulders should be used. 3On arterials, shoulders fully surfaced. 4On collectors, use minimum 1.2 m shoulder width at locations where roadside barrier is utilized. 5For collectors, shoulders fully surfaced for 1500 or more ADT.

**Design Guidelines for Passing Lanes on Two-Lane Roadways ...**

The design guide provides recommendations on the design of the particular facility. The design guide discusses the particular facility (giving either tacit approval or endorsement for its use), and provides recommendations of another source for recommended design of the facility.
