Using a Dichotomous Key Take a few minutes to sort through and group the insect cards by physical characteristics. A dichotomous key is a tool that allows the user to determine the identity of an item based on physical traits. Keys have a series of two choices in each step that lead the user to the correct name of a given object.

Using a Dichotomous Key - George West Pri

A lot of the extant keys have pretty shitty dichotomies, like "Looks like fig.4/Does not look like fig 4" which is kind of a cop-out. On the other hand, if you've ever tried to key an insect to species, you will know well how frustrating some characters can be, like "metatibia more than 7/10ths as long as first tarsal segment, but shorter than 9/10ths."
