Measurement

The Consortium for Advanced Manufacturing International created the Dimensional Measuring Interface Standard (DMIS) to enable coordinate measuring machines (CMMs) to communicate seamlessly with each other. Traditionally, each CMM manufacturer developed its own programming language and embedded it within its measuring-application software.

Demystifying DMIS - Quality Digest

Learning to use PC-DMIS Level 1 will give first time users of PC-DMIS a basic understanding of the software and measurements necessary to write and execute inspection plans. You do not need any prior knowledge of metrology or PC-DMIS as this course begins with the very basics. The course curriculum includes a series of instructional videos and reference documents with quizzes at the end of each segment.

Learning to use PC-DMIS Level 1 - CMMXYZ

High Level Language in DMIS. Almost every CMM software package provides HLL in various formats: native DMIS, non-Dmis, VB script, etc. Even in very old software like Umess, you can do very complicated things in PCM, for which a thick book can be written. Since many software in the market is still trying to comply with dmis standard to a high percentage and I'm a fan of dmis programming so I'll use dmis HLL as example.

High Level Language in DMIS - CMM Quarterly Home

The High Level section of DMIS is the part of the language that most closely resembles other computer languages. It includes statements that allow the programmer to declare and use variables, perform calculations, control program flow, etc.
