from theory to practice, from regional to global. The fields covered include organismal, population, community, and ecosystem ecology; physiological, evolutionary, and behavioral ecology, and conservation science.

## **Global Ecology and Conservation - Journal - Elsevier**

Conservation is a crisis discipline, one demanded by the unusual rates of loss; it is also a mission-driven one. By analogy, ecology and conservation have the same relationship as physiology and medicine. Human physiology studies the workings of the human body, whereas medicine is mission-oriented and aims to understand what goes wrong and how to treat it.
