Event History Analysis Applied Social Research Methods

Scope. Scope: Event history analysis is an important analytical tool in many fields of the social sciences. This course covers the standard tools used for event history analysis--things like parametric survival models, life tables, Kaplan Meier estimates, and the Cox proportional hazards model. Additionally, the course focuses on building a tool kit so that you can develop custom event history models that involve non-standard methods like subgroup heterogeneity, modeling an "immune" ...

Event History Analysis for the Social Sciences, CS&SS 544

Event history analysis is a term commonly used to describe a variety of statistical methods that are designed to describe, explain or predict the occurrence of events. Outside the social sciences, these methods are often called survival analysis, owing to the fact that they were originally developed by biostatisticians to analyze the occurrence of deaths.

Event History Analysis - SAGE Research Methods

P.K. Andersen, N. Keiding, in International Encyclopedia of the Social & Behavioral Sciences, 2001.
