D&D 5e Monster Manual

I have had two ultrasounds and a ct. I have a very distended bladder that held over 1400 cc prior to voiding. After voiding twice I had residual urine. The ct noted distended bladder. One ultrasound showed mild hydrophrenosis in one kidney. I had a uroflow test, and overflowed the beaker and still had a full bladder.

"Urinary retention and distended bladder": Incontinence ...

An infection can also cause a distended bladder. Swelling from the condition may put pressure on the urethra and cause it to compress. If the urine is unable to pass through the urethra, then being able to use the washroom is a problem.

Quality Measures | CMS

prostate cancer. Once the prostate gland and seminal vesicles are removed, the bladder is reattached to the urethra. A catheter is left in the bladder to allow drainage of urine while healing takes place. In addition, a “drain” (tube that drains fluid accumulations) is left in place for one or two days.
