The first law of thermodynamics: The total change in internal energy of a system is the sum of the heat added to it and the work done on it.

## **Lecture 6 - School of Physics - Faculty of Science**

First Law of Thermodynamics. Energy is the ability to do work or transfer heat. Work is the transfer of energy from one body to another. In a sense, work is energy in the process of transfer. This association between work and energy allows us to define a unit of energy as that quantity transferred when a unit of work is done.
