Developed and published by Crane and distributed via www.flowoffluids.com (an ESI business), the TP-410 is a technical resource for engineers, designers and engineering students that explains the flow of fluid through valves, pipes and fittings to aid in the appropriate selection of equipment for piping systems.

New Edition of Technical Paper No. 410 - CRANE ChemPharma ...

Flow of Fluids Premium uses the Darcy-Weisbach method for calculating the pressure drop in a pipeline. This method assumes the density of the fluid is constant in the pipeline. The Crane Technical Paper 410 states that the Darcy-Weisbach method provides satisfactory results under the following conditions:
