Flying Colors - Featuring over 1300 military aircraft ...

This was the standard U.S. aircraft marking in 1942. A thin yellow outline was briefly added to the blue circle on warplanes operating in Europe and North Africa; the RAF already had a similar golden ring around its well-known blue, white and red roundel so as to make the markings stand out more.

Flying Colours - A Short but Vivid History of Warplane ...

USAAF unit identification aircraft markings, commonly called "tail markings" after their most frequent location, were numbers, letters, geometric symbols, and colors painted onto the tails (vertical stabilizer fins), wings, or fuselages of the combat aircraft (primarily bombers) of the United States Army Air Forces during the Second World War. The purpose of these markings was to provide a means of rapid identification of the unit to which an aircraft was assigned.

USAAF unit identification aircraft markings | Military ...

Of all the early operators of military aircraft, Germany was unusual in not using "round" roundels, but after evaluating several possible markings, including a black, red and white checkerboard, and a similarly coloured roundel, and black stripes, a black "iron" cross on a square white field was chosen as it was already in use on various flags, and to reflect Germany's heritage as the Holy Roman Empire.
