Forex Trading Technical Analysis

Technical analysis boils down to two things: identifying trend. identifying support/resistance through the use of price charts and/or timeframes. Markets can only do three things: move up, down, or sideways. Prices typically move in a zigzag fashion, and as a result, price action has only two states: Range - when prices zigzag sideways.

Understanding Technical Analysis | FOREX.com

Technical analysis is the framework in which traders study price movement. The theory is that a person can look at historical price movements and determine the current trading conditions and potential price movement. Someone who uses technical analysis is called a technical analyst.
