This time the voltmeter was at the proper

place, about 2/3rd way up and approximately 13 or 14 bolts. Later in

the evening, the light came on again but only below 1500 RPM and the meter was $\frac{1}{3}$ and around 1 volt. I

returned to the auto repair shop again and discovered that they had given me a rebuilt alternator - a bad

generator or to replace
your generator...that is

the question. It's a
dilemma many

generators of a certain
age present to their

owners. The genset
prompts so many

service calls that Joe
the mechanic feels like

a member of the

family, and you're

beginning to question

its reliability.
