The HID 1386 ISOProx II Cards offer proximity card technology with photo identification capability on a single access control card. It is ISO 7810 compliant, with a nominal thickness of .030". The cards features a graphics quality surface optimized for Photo ID printing, and is available in standard PVC construction.

HID 1386 ISOProx II Cards - Printable - Qty 100

An HID prox card utilizes radio frequencies (RFID) or a special microprocessor embedded into an ID card. The cards are encoded upon printing, which is usually done with a special encoder, like a Fargo HDP5000 ID card printer. ID cards with RFID antennas have small radio receivers embedded in an ID card which hold the encoded information.

Proximity cards, also known as Prox cards or access control cards, are contactless ID cards or keyfobs containing programming that is "read" by a card reader to control and secure physical access.. Inside each card or keyfob is an integrated circuit containing specific numerical programming and a coiled antenna, which increases the range at which the card can be read.
