Abstract. Several of the key organizational issues that we have had to face with the emergence of COVID-19 crisis are related to human factors/ergonomics (HFE) and the safety culture. During the crisis the main activities of the healthcare services have been profoundly affected. Patient safety and risk management units have also experienced the need to adapt rapidly.

Human factors and ergonomics at time of crises: the ...

As a unique scientific discipline, human factors and ergonomics systematically applies the knowledge of human abilities and limitations to the design of systems with the goal of optimizing the interaction between people and other system elements to enhance safety, performance, and satisfaction.
