Once your focus is set, turn off the light and set the lens to manual focus (so it doesn't search for focus again) and take the shot. Shoot in Raw Format. With all of the challenges involved in low light photography, shooting in raw can give you the flexibility to save a picture that might be unrecoverable if you shot it in JPEG.

Light & Lens Camera Club - Home | Facebook

A photograph (also known as a photo) is an image created by light falling on a photosensitive surface, usually photographic film or an electronic image sensor, such as a CCD or a CMOS chip. Most photographs are created using a camera, which uses a lens to focus the scene's of light into a reproduction of what the human eye would see.

LIGHT & LENSES photography . Family Signature Shoot. My absolute favorite subjects to photograph are families! Newborn bliss. This adorable family just welcomed a beautiful baby girl! Big sister was a little curious about her little sister but full of love! I absolutely loved capturing this sweet time of their lives.

Light and Lens: Photography in Digital Age 2nd edition ...

Low light - That huge aperture is a great advantage when photographing in low light. Street photography after dark is moody and atmospheric, and the best lens to capture this is a prime lens. Bokeh - The large aperture also comes with another benefit, namely bokeh. Using bokeh in street photography is undoubtedly an advantage.

Of Light and Lens Photography

Lightpainting is a form of long exposure photography, and there aren't a lot of people who do it. We set up a camera on a tripod and then I wave a bunch of lights around. I know it sounds CRAZY. And it is, with the results we get. So when we get together for a session your photos are going to be one-of-a-kind.
