The magic lantern, also known by its Latin name *lanterna magica*, is an early type of image projector that used pictures—paintings, prints, or photographs—on transparent plates (usually made of glass), one or more lenses, and a light source. It was mostly developed in the 17th century and commonly used for entertainment purposes. It was increasingly used for education during the 19th century.

The OEM manual is printed in tiny font, in a light type, is basically an elaborate checklist of features, and is practically impossible to read. The MLG is an improvement. However, that being said, there is too much discussion of basic photography techniques, which MLG was specifically not supposed to be.
