The hydrostatic transmission (HST) provides maximum ease of use and fast, simple direction changes, making it extremely effective for frequent front-end loader work, mowing or maneuvering in wooded areas while clearing brush. A hydrostatic transmission uses hydraulic pressure to change your speed, to operate similar to a vehicle.

Transmission Options - Compact Tractors - Bobcat Company

A Toploader transmission is a manually shifted three and four speed gearbox introduced in 1963 by the Ford Motor Company to replace the BorgWarner T-10. It was used in most Fords and Mercurys from 1964 until 1973 as well as some foreign models. Officially designated the 3.03 three speed or Ford design four speed. The 3.03 is the centerline distance between counter shaft and mainshaft.

These four-speed units will bolt into many existing Ford standard-shift applications. If you are converting from an automatic, you will need to find a compatible manual bellhousing to go with your Toploader. There were 18 different Ford bell housings used from 1963 to 1973 that will accept this transmission.

Ford Toploader Four-speed Transmission | Hemmings

If the transmission sounds and works well, but is hard to shift, the linkage is faulty and not a difficult repair in most circumstances. If the transmission is a top loader, which is the type where the gear shift enters the top of the transmission, the shifting fork or the ball at the end of the gear shift is the problem.
