Emacs will by default use lexicographic sorting for all but the sort-numeric-fields command. Make sure you use the right command for the job if you want to sort numbers. You can reverse the order of some sort commands by using a negative argument; for the commands where this does not work you must use M-x reverse-region.

Sadly, most of the point and mark commands generally go unnoticed by people who never used Emacs without tmm. That's a shame, because mastering the mark commands will greatly speed up movement and editing. In tmm the command C-SPC activates the region and lets you select text as you see fit.

Fixing the mark commands in transient mark mode ...
I'm on page 36 (emacs Client-Server) it says that there are two options, the first is using emacs start-server and the next is emacs --daemon. It mentions on the bottom of page 37 that if I go the server route I cannot use the traditional emacs binary or whatever. Does this include the emacs --daemon?

With Emacs 24 looming around the corner I figured it was time I took a close look at all the new features and changes. As it's not officially out yet I will settle for the pretest build (get it here.)With that said, there's little difference (in my experience anyway) between the pretest versions of Emacs and the real mccoy.

Mastering Emacs is the first tech book in a long time I've read cover-to-cover, taking notes and making bookmarks as I've went. I've referred back to it many times in trying to get more helpful commands in my daily workflow. I gleaned a lot and – ironically – the biggest point Petersen makes is that Emacs is self-documenting.
