Functions. Zero Forcing Equalizer is a type of linear equalizers used to combat ISI (inter symbol interference).

This codes is a demonstration of a

simple

implemenation of Zero Forcing Equalizer using MatLab tools. A

typical channel is model in discrete

domain as:

$$y[n] = h[n] * x[n] + z[n]$$

Read Online Matlab Code Zero Forcing Algorithm

equalization is the simplest method to estimate the transmitted symbols in a MIMO system using linear space time coding (See reference for the theoretical background). For particular codes (orthogonal codes), ZF equalizer gives the same results than the optimal (ML) receiver. The zip file contains three m files.
