An issue on the first year M119 which I hadn't known about until I got my 1991 500SL which left the birthing place in Sept. 1990 was the rotor brackets inside the distributor caps. MBZ changed their design after the first model year and if you still had those in there, your nice new rotors will most likely crack, the engine will not run right.

The W123 was nearly undestroyable and offered huge amount of space. It even had a super cool 7-seater option with a folding third seat row. But it never was fun or powerful. With a swapped in LS this car gets close to what I imagine a 6.3 SEL Wagon would feel like. But I'm a engine swap lover anyway, so probably I am biased.
