One of the most common problems in MINI Cooper repair involves the coolant system. The water pump is most significantly affected. Fixing this problem can be a pretty penny so it's important to have your car serviced before this happens. Many mechanics recommend replacing the water pump and thermostat no later than 50,000 miles.

How to Resolve Common MINI Cooper Repair Issues

Mini Cooper TF60SN Common Issues Many Mini Cooper drivers have complained of these issues with the transmission. In some cases, it can be comparatively subtle, perhaps as a slightly rough shift up or down, but in others they may experience loud bumping and rattling that makes them feel as if their car is about to come apart.
