Self-determination theory (SDT) maintains that an understanding of human motivation requires a consideration of innate psychological needs for competence, autonomy, and relatedness. We discuss the SDT concept of needs as it relates to previous need theories, emphasizing that needs specify the necessary conditions for psychological growth, integrity, and well-being.

Motivation has as many faces as there are human desires. The simplest definition of motivation boils down to wanting (Baumeister, 2016). We want a change in behavior, thoughts, feelings, self-concept, environment, and relationships. People often say that motivation doesn't last. Well, neither does bathing - that's why we recommend it daily.

There are several theories that explain motivation as a result of these needs. The underlying concept is the belief that an unsatisfied need creates tension and a state of disequilibrium. To restore balance, a goal is identified that will satisfy the need and a behavior pathway to this goal is selected.

the authors review the theory of motivation presented by robert w. white in his book "lives in progress" (1952) and in an article "motivation reconsidered--the concept of competence" (1959). white proposes the concept of "competence" to account for those things in human behavior left unexplained by other theories of motivation.

ERIC - ED013985 - THE DEVELOPMENT OF INTELLIGENT BEHAVIOR ...

Robert W. White (1904–2001) was an American psychologist whose professional interests centered on the study of personality, both normal and abnormal. His book *The Abnormal Personality*, published in 1948, became the standard textbook on Abnormal Psychology. A historian in perspective, White did not focus entirely on abnormal psychology, but investigated the coping methods of normal people.
