Parental Resistance And Social Worker

Parental resistance is a ubiquitous feature of child and family social work, yet there has been limited research or theoretical work directed at the issue. This paper identifies social and individual reasons why parents may be resistant. Five principle causes of parental resistance are discussed, namely social structure and disadvantage, the context of child protection work, parental resistance to change, denial or minimization of abuse or neglect and the behaviour of the social worker.

Professional social workers frequently encounter a thorny situation called client resistance. As resistance is inevitable in the intervention process and will very likely affect the intervention outcomes, study of client resistance is important to social workers and learning how to manage it will be pivotal to achieve expected goals and objectives. This paper will firstly narrate the writer s personal experience so as to put the issue of client resistance on the agenda and give a brief ...

Understanding And Coping With Client Resistance Social ...

Sales resistance is helpful for the purpose of practicing thrift and saving money." Clients are sometimes resistant because the counselor is asking them to deal with an undesired agenda, Wubbolding says. "Resistance means we're working on the wrong problem a problem that the client doesn't care to work on.

Managing resistant clients - Counseling Today

Social workers have roles that require them to engage with clients and families who may be 'reluctant clients', ambivalent or resistant towards those seeking to help and protect. This includes safeguarding roles in relation to children and vulnerable adults, and work to engage with marginalised groups such as young offenders and those with mental health and substance misuse problems.
