There are around 120 million rods in the human eye and six to seven million cones.

The cones are responsible for the eye's color sensitivity. They reside mostly in your eye's macula.

Photography - LASIK

Louisville Kentucky

The fundus is the inside, back surface of the eye. It is made up

Acces PDF Photography

of the retina, macula, optic disc, fovea and blood vessels. With fundus photography, a special fundus camera points through the pupil to the back of the eye and takes pictures. These pictures help your eye doctor to find, watch and treat disease.
