I ended up mixing some solutions from here, because I am not using the HttpFileBase and only have the file stream, I had to read the first few bytes of the stream to determine the mime type. Note: I don't use the registry technique because I don't know what will or wont be installed on the servers.

Long story short, I am using the flow to convert docx files to pdf. The flow is looping back a 2nd time when the pdf file is created. If i can get the trigger condition to work, it will save me a 2nd flow run. The main issue is getting the file type, file extension recognized. How can I write the trigger condition expression to do what I need?
