Over the years, it developed multiple leaks, which damaged parts of the roof's structure. The roof was beyond the patching or recoating stage, the insulation was compromised in spots, and long-term exposure to water resulted in some damage to the roof deck. Liberty wanted a new top-quality roof system with an affordable price tag.

The infrared readings detected moisture from the wall at the stairwell building proving this area appeared to have ponding water issues. The APOC System selected for this restoration, APOC Guide Specification AM-BU-585, delivered a durable waterproof membrane over the existing roof surface which had retained structural integrity but had become weathered and deteriorated.
