Punnett Square Problems Continued Worksheets - Learyn Kids

HINT: Each genotype shown in the Punnett Square has a 25% chance of occurring. If the same genotype appears in more than one square, the probabilities are added: 1 square = 25% probability, 2 squares = 50% probability, 3 squares = 75% probability. If the same genotype appears in all 4 boxes, 100% of the offspring will have that genotype.
