### Python Documentation contents - Python 3.6.4 Documentation

In Python 3.2, a new means of configuring logging has been introduced, using dictionaries to hold configuration information. This provides a superset of the functionality of the config-file-based approach outlined above, and is the recommended configuration method for new applications and deployments.

### Logging HOWTO - Python 3.6.4 Documentation

6.2.1. Regular Expression Syntax. A regular expression (or RE) specifies a set of strings that matches it; the functions in this module let you check if a particular string matches a given regular expression (or if a given regular expression matches a particular string, which comes down to the same thing).

Python 3.6.10 API documentation with instant search, offline support, keyboard shortcuts, mobile version, and more.

### DevDocs — Python 3.6 documentation

Starting with Python 3.6 the asyncio module is no longer provisional and its API is considered stable. Notable changes in the asyncio module since Python 3.5.0 (all backported to 3.5.x due to the provisional status): The `get_event_loop()` function has been changed to always return the currently running loop when called from coroutines and callbacks.

### Overview — Python 3.4.10 documentation

1. Extending Python with C or C++. It is quite easy to add new built-in modules to Python, if you know how to program in C. Such extension modules can do two things that can't be done directly in Python: they can implement new built-in object types, and they can call C library functions and system calls.. To support extensions, the Python API (Application Programmers Interface) defines a set ...

By combining together these and similar commands, intricate shapes and pictures can easily be drawn. The turtle module is an extended reimplementation of the same-named module from the Python standard distribution up to version Python 2.5.. It tries to keep the merits of the old turtle module and to be (nearly) 100% compatible with it.
