Apply your quantitative reasoning skills by answering the questions provided in the resource and writing a short essay. After you answer the questions, your short essay should include: a one-paragraph narrative summary of your findings, describing patterns of interest

Quantitative Analysis - 00523318

Previous period's sales revenue x (1 + % rate of sales growth) = next period's revenue. Say, for example, you were trying to predict next month's sales based on the fact that sales are growing by 30% each month and revenue last month was \$100,000. So in this case, the formula would be: \$100,000 x (1 + 30%) = \$130,000.
