I really doubt that there is a solution manual. Once you get beyond Linear Algebra and Differential Equations most books don't have solution manuals. You could always look in the other math books at the library and you may find some of the problems that you are doing in those books (math books are in the QA section).

I am currently studying Group Theory from I.N. Herstein's Topics in Algebra. However after studying about 50 pages of it I felt it lacks a bit of geometrical flavour (one of my friends described via email some time back how dihedral groups were treated in his course). He also said that Herstein's treatment is not exactly very modern though it supposedly has some good exercises.
