### TV calibration. Screen calibration. How to calibrate ...

TV Placement: Position the TV so you can view it straight on. Avoid placing it where you need to look up, down, or at an angle to the screen. The farther you view off-angle from the center, the colors will fade, and the contrast will narrow. Room Lighting. Light from windows or lamps located to the side and across from the TV reflects off the screen. Even models that may have an "anti-glare" or "anti-reflective" screen coating, the picture won't look good if the light hits the screen.
