Cut a strip long enough to go around your model's fuselage; cut this strip in half with scissors somewhat raggedly along its length; remove the protective backing from the half strip so that the tape's adhesive is exposed; and apply the half strip of tape around your fuselage so that its straight edge is where you want the desired panel line.

Tech Tips: Scribing Panel Lines - Tsohost

Blades: Its unique blades are great and have multiply angles and cutting edges which is exactly why you should buy this particular model. Perfect panel lines: It's designed specifically for scribing panel lines in plastic. So, if you want to make perfect panel lines this tool is far better than a needle tool or a scribe or an exact knife.

Best Scribing tool! Craftsman's Best Friend - DIY Tool Expert

For making perfect panel lines this tool is far better than a needle tool or a scribe or an exact knife. It's designed specifically for scribing panel lines in plastic - nothing else. It follows a straight edge without scratching or cutting into your ruler. Two light passes and your panel line is done. Try three or four for more prominent lines.

Amazon.com: Tamiya America, Inc Plastic Scribe II ...

Scribing is a simple technique that lets you fit cabinets, countertops, moldings and almost anything else to crooked walls. Using little more than a cheap compass fitted with a sharp pencil, you can easily transfer odd shapes or the profile of a wavy wall to your workpiece.

How to Scribe for a Perfect Fit Using a Woodworking ...

Usually the first step when scribing a plastic airplane model is to make smooth the parts to be scribed. You can start by shaving off as much detail as possible with a dull hobby knife (a sharp blade increases the chance of gauging into the surface). After shaving, finish the removal by lightly wet sanding with fine sandpaper (800-grit or finer).

Scribing Surface Details on Your Aircraft Model - Model Aces

Buy the narrowest (usually 1/4 inch -- about 6 mm) width of this tape -- in a bright color, if possible, so you can easily see where to scribe; cut a strip long enough to go around your model's fuselage; cut this strip in half with scissors somewhat raggedly along its length; remove the protective backing from the half strip so that the tape's adhesive is exposed; and apply the half strip of tape around your fuselage so that its straight (originally outer) edge is where you want the desired ...

Scribing Panel Lines | Large Scale Planes

Panel Line scribing : A lot of model kits come in a pretty basic design. Many No Grade, High Grade, and some of the older Master Grades, have next to no details. Newer kits have an abundance of panel lines intersecting large parts of armour which breaks up the boring look of an otherwise featureless piece.

The Ghost of Zeon : How-To : Panel Line Scribing

Squadron's scribing tool is a good choice for your scribing needs. I use it to rescribe panel lines on my aircraft models. The scribing point removes a thin layer of plastic as you draw it across the surface instead of pushing the plastic out of the way like knife blades or pointed objects. Good quality and a good price.
