Understanding Hysteria in the Past and Present

The Major Symptoms of Hysteria. Pierre JANET (1859 - 1947) In this series of lectures delivered in English by the author while visiting the USA, Janet summarises the (at the time) cutting edge perspective on the various forms of hysteria. The syndromes include generalised amnesic states and conversion disorders, and show Janet's highly influential views regarding the fundamental role of dissociation.

The Major Symptoms of Hysteria: Fifteen Lectures Given

in ...

The stigmata of hysteria are the essential constitutive symptoms of the illness, as enduring, persistent, and permanent as the illness itself. The patient who may feel himself weakened in some way, but who is unable to specify correctly the symptoms from which he suffers, presents with a relative indifference to his symptomatology.

Trauma Information Pages, Articles: Van der Hart et al (1989)
