Tooth Bruise Manual Guide - modapktown.com

Just like a bruise on your knee from falling off a bicycle, a bruised tooth is typically caused by trauma or injury. The black and blue of a body bruise are the result of capillaries bursting and darkening the surface of the skin. A similar discoloration can occur on an injured tooth. The impacted tooth might also ache from the blow to the ligaments that support it.

Bruxism is clenching or grinding of teeth. In patients with bruxism, which condition most often worsens tooth abrasion and erosion?

Tongue Trauma - Dental Disorders - Merck Manuals ...

Trauma to a tooth induces an inflammatory reaction consisting of hemorrhage from the pulp into the dentinal tubules. This causes a slight pinkish change in the color, often only noticeable in the gingival 1/3 of the tooth. As the hemoglobin breaks down, it leaves iron sulfide in the tubules, which produces a darker black color.
