The WEINIG structure planing technology makes it possible to move the spindle relative to the work piece as it is fed through and in this way to create a three-dimensional surface. Using CAD

software the structured surfaces can be checked and simulated in advance and then actually produced on the moulder.

### **Planing and profiling with WEINIG**

WEINIG meets this challenge with innovative machine technology. The combination of slanted horizontal spindles and floating vertical spindles allows the lamellae to be planed with a minimum of chip removal on all four sides while maintaining the curvature of the wood. These WEINIG solutions increase material yield and thus also resource efficiency.
