Evolutionary psychologists sometimes suggest that it's natural for human groups to wage war because we're made up of selfish genes that demand to be replicated. So it's natural for us to try to get...

### The Psychology of War | Psychology Today

In The Psychoanalysis of War, Fornari located the anxieties and psychotic fantasies that govern the behavior of individuals in groups. War, he said, arises from the external projection of an internal danger in the face of an alleged external persecutory entity, which compels individuals and societies to destroy in order to survive.

### The Psychoanalysis of War

That being the case, you might have expected the war that broke out in 1914 to be a very psychological one. In Britain it was not. The military scarcely knew about psychology – apart from a few oddball intellectuals like J.F.C. ('Boney') Fuller, who tried to make use of Gustav Le Bon's crowd theories.

### Psychology and the Great War, 1914-1918 | The Psychologist

Psychoanalysis, with its focus on neurosis due to early childhood trauma, seemed perfectly situated to deal with war neurosis: it had an explanation for why some soldiers got "shell shock" and others did not (Oedipus complexes, inappropriately cathected libido, etc.) and it had a way to treat them (psychoanalysis).
