□ As per section 36 (1) of the DPR a Completion / Workover Report must be submitted within 30 days of the end of each completion and workover, suspensions or abandonment operation, with an attached downhole schematic diagram, in color. □ Refer to the Well Data Submission Requirements Manual for file naming types and submission methods.

Completion and Workovers Maintenance

Completions and workover operations are alike in that they vary depending on the type of well and the area. They can be as simple as changing out pumps in a rod job, or as complex as a multiple zone recompletion with a three or four-stage stimulation treatment. Sometimes workovers are done to control excessive water...

Workover Well Control Manual ~ Oil and Gas Book Reference

Workovers are normally required to temporarily abandon or to plug and abandon a well. Operations may include squeeze cementing, setting plugs (cement or mechanical), retrieving production equipment, and perhaps cutting and pulling casing. Workover costs vary depending on well conditions and regulatory requirements. Workover considerations
